

Math 4107, Fall 2021, Homework 0

Registration name:

Sean Eva

Name you wished to be called in class:

Sean

gtID#: 903466156

(3 points) Provide a recent, clearly recognizable image of yourself:

Major(s) and target graduation date: I am majoring in Math and I plan to graduate Spring 2023

At least one reason why you chose the field(s) of study that you did: I really enjoyed math related activities in high school such as things like math team and tutoring students. Additionally, I knew I wanted to go into a STEM field but not what in specific, so I chose to major in math so that I have a lot of opportunities for what I can do in the future.

List your last three math classes, including professor and semester (and institution if not Tech):

1. MATH 3406: Linear Algebra 2, Igor Belegradek
2. MATH 3235: Probability Theory, Federico Bonetto
3. MATH 2106: Intro to Math Proofs, Jen Hom

Do you have a regular commitment (like class or job) from 5 – 6pm on Monday and/or on Tuesday?

I have a class on Mondays from 5pm - 6:55pm, but I do not have any obligations on Tuesday.

(2 points) List two 4107 classmates (first & last names) who could be your study partners.

Armand Morosanu, Joshua White.

(3 points) In your own words, briefly describe the content guidelines for homework solutions.

Student solutions to homework problems should be their own words. If they sought help they should cite who and/or where they got help from.

(5 points) Post a math joke in the “hw0” folder on Piazza. Use your name as the note summary/title.
